CMS'05 Special Session on

Methods of Genetic Programming

organized by

ROBERT SCHAEFER

Institute of Computer Science, Jagiellonian University, Cracow

- *Rafael Montenegro, G. Montero, E. Rodríguez, J.M. Escobar, J.M. González-Yuste, University of Las Palmas de Gran Canaria, Spain*
Three-dimensional adaptive discretization and genetic algorithms for wind field adjusment

- *Bill Teahan, School of Informatics, University of Wales, Bangor, United Kingdom,*
On thought, knowledge, evolution and search

- *Anthony Brabazon, Dept. of Accountancy, University College Dublin Belfield, Dublin, Ireland*
Recent Adventures in Grammatical Evolution

- *Michael O'Neill, Dept. of Computer Science & Information Systems, University of Limerick, Ireland*
Credit Rating with piGrammatical Evolution

- *Iwona Karcz-Dulęba, Institute of Engineering Cybernetics, Technical University of Wroclaw, Poland*
Unstable behavior in a dynamical system generated by phenotypic evolution

- *Roman Galar, Institute of Engineering Cybernetics, Technical University of Wroclaw, Poland*
On Institutional Implementation of Evolutionary Algorithms
